Micro-needling with MPEN

\$284

Micro needling is a minimally invasive procedure that creates thousands of microchannels in the epidermis through tiny perforations. This induces a natural healing response resulting in the formation and remodelling of new collagen and elastin. A skin consultation will be undertaken at each session, allowing your therapist to provide the best solutions and formulas to improve many skin concerns, such as acne scarring, fine wrinkles, enlarged pores, loss of firmness and pigmentation reduction.

Microdermabrasion

\$165

Microdermabrasion is a minimally invasive procedure targeting the upper layer of skin (epidermis) and works by stimulating the skin to tighten collagen and elastin fibres.

IPL Skin Rejuvenation – Full Face

\$295

IPL uses light energy to target accurately and remove pigmented or damaged skin cell, redness and stimulate collagen production. Our certified, highly experienced therapists will undertake a skin consultation to provide the best solution for you.

IPL is a proven method to reduce and resolve many conditions, such as acne scarring, spider veins, broken capillaries, rosacea, age spots, fine lines and sunspots.

Rosacea Areas

\$150

IPL offers reduction of redness and capillaries across the nose and cheeks. The light heats cells in the skin and breaks them down. The body then removes the treated tissue naturally.

As always, a skin consultation will be undertaken at each session, to allow your therapist to provide the best solutions and treatments to resolve your specific skin requirements.

Pigmentation Areas

\$150+

IPL targets affected areas in reducing discolouration deep within the skin. For significant or longer-term skin damage, several sessions over your skins natural rejuvenation cycle will see a visible reduction in a return to a more even skin tone.

Pricing is subject to the size and area to be treated. Advice will be provided through a full consultation from your therapist.
